

Science - Year 5 - How have our ideas about space changed over time?

Sticky Knowledge:

- To know how the Earth and other planets orbit the sun., and what the sun is.
- To know and explain how the moon orbits the Earth.
- To know that the sun, Earth and moon are approximately spherical bodies.
- To know that the Earth spins on its axis.

Glossary

Sun	A huge star that earth and the other planets in our solar system orbit around.
Star	A giant ball of gas held together by its own gravity.
Moon	A natural satellite which orbits Earth or other planets.
Planet	A large object, round or nearly round, that orbits a star.
Sphere	A round 3D shape in the shape of a ball.
Satellite	Any object or body in space that orbits something else.
Orbit	A curved path of a celestial object around a star, planet or moon
Rotate	To spin
Solar system	The collection of 8 planets and their moons in orbit around the sun. Includes asteroids, meteoroids and comets.
