

So What's The Difference?

Reuse

Recycle

Repurpose

Glossary:

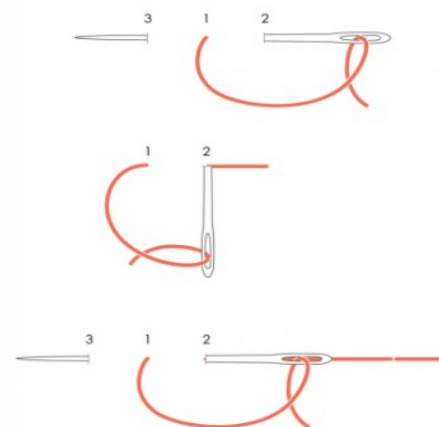

- Repurpose - changing the purpose of a product to make a new product
- Pattern/Template - a shape drawn to exact shape and size and used to assist cutting out.
- Seam - a line of stitching that joins pieces of fabrics together.
- Seam Allowance - extra fabric allowed for joining together - usually 1.5cm.
- Prototype – a model that is made to test whether a design will work.
- Tie-dye - a creative way of colouring fabric.
- Designer - someone who creates and executes plans for a project.
- Aesthetics - the way in which the product looks with the nature and expression of beauty.
- Recycle—convert (waste) into reusable material.
- Upcycle – reuse (discarded objects of material) in such a way as to create a product of quality.
