

# Year 3 - Autumn 1 - Sequencing Sounds

There are lots of different ways to start your code. Programming blocks

Programming area

Stage with sprite

Each block in Scratch is a **command** which controls your sprite or stage. Clicking them together builds up **sequences** of code.

A **Sprite** is an object in Scratch that performs functions controlled by scripts

Explore and add new sprites

You can change the sprites character using the **purple** code blocks.

Change the sprite's costume.

Add sound to your sprites.

Don't forget to name your sprites to make your code easier to understand.

## Glossary:

- **Loops:** Commands that repeatedly run a defined section of code
- **Program:** A set of ordered commands that can be run by a computer to complete a task.
- **Algorithm:** A precise set of ordered steps that can be followed by a human or a computer to achieve a task
- **Debug:** The process of finding and correcting errors in a program.
- **Inputs:** A piece of hardware used to control, or send data to, a computer.
- **Output:** A piece of hardware that is controlled by outputs from a computer.

## Sticky Knowledge:

- To know what decomposition is.
- To know that the sequence of commands can affect the outcome.
- To know there are different computing languages
