

## Sticky Knowledge:

- To know that computers work on the binary system (0, 1)
- To know binary can represent letters, pictures and sound.
- To know and be able to order different file sizes (kb, mb, gb, tb).
- To know that computers have changed over

A	01000001
B	01000010
C	01000011
D	01000100
E	01000101
F	01000110

## Name Symbol Equal to

Kilobyte	kB	1024B
Megabyte	MB	1024KB
Gigabyte	GB	1024MB
Terabyte	TB	1024GB

## Glossary:

- **Decompose:** To break down a task into smaller, more achievable steps.
- Connected
- **Network:** A group of interconnected computing devices.
- **Bit:** The smallest unit of data in computers. A bit can only have two values, which are often represented as one or zero.
- **Binary:** A number that uses only two digits is called binary. All computers calculate in binary.
- **Search engine:** a service that allows users to search for content via the World Wide Web (WWW)
- **Information:** Data put into a context that provides meaning
